

Microbiology Services

Professional. Dependable. Committed

Total Coliform (Colilert) (p/a) (SM9223B)	\$16.00
Total / Fecal Coliform by MF (SM9222B)	\$16.00
Heterotrophic/aerobic Plate Count (SM9215)	\$21.00
Pseudomonas aeruginosa MF (SM9213E)	\$20.00
Iron Related Bacteria (Bart)	\$40.00
Sulfur Reducing Bacteria (Bart)	\$40.00
Microscopic Exam (What is it?)	\$65.00 Per Hour
Microscopic Consulting	\$75.00 Per Hour
Bacterial Identification (Per Colony)	\$50.00

Troubleshoot your Well to find out what is causing the monthly Total Coliform test to fail.

This will help determine if additional chemicals need to be added in addition to chlorine!

For Additional Information Contact Donna Clifford at

(309) 683-1765/1766

Surface Waters

E-coli (SM9223B) (Colilert) \$25.00

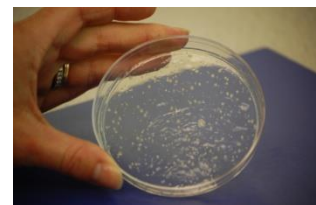

Determine if your beach is safe for swimming.

Chlorophyll is a useful test to diagnose lake problems, to determine if the algicide is effective, or to assess the long term trends of the lake.

Chlorophyll a * (SM10200H)	\$21.50
Chlorophyll b * (SM10200H)	\$21.50
Chlorophyll c * (SM10200H)	\$21.50
Pheophytin A * (SM10200H)	\$21.50
*Additional Prep Charge	\$30.00
(One Prep Charge Per Sample)	

"Don't see the testing you need here? Just ask us and we can investigate or give a recommendation to help you find what you need!"
